

KENNY REDMAN

I am currently a programmer, developer, and designer looking for a position in a field where I can use my creativity, technical experience, design experience, and people skills. I have over 12 years of design and programming experience using everything from all Adobe products to handcoding HTML/CSS to creating large software applications and web sites. I also have extensive mechanical skills such as construction, woodworking, machine and small engine maintenance and rebuilding, and computer building with a bit of IT work dealing with networking and Virtual Machines.

UX/UI DEVELOPER & SENIOR PROGRAMMER CG VISIONS

Lafayette, IN
2007-Present

Currently the UX/UI developer and have an extensive background in Computer Graphics, Programming, and Fine Arts. I've had several responsibilities over the years and have been involved with both print and web design, programming, 3D modelling, rendering, and animation work.

With all of that experience, my main priorities are to help develop streamlined, intuitive software and receive feedback via user testing on how to best improve user experience with our proprietary software applications.
